PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience specializing in high-scale E-commerce and Fintech architectures. Proven track record of leading high-risk migrations - including legacy PHP to Next.js transitions. Expert in optimizing SaaS infrastructure costs and resolving single points of failure through CDN caching and event-stream redesign. Strong technical partner to Product and Marketing teams, dedicated to automating internal workflows and mentoring high-performing remote teams.

CORE COMPETENCIES

React & Next.js	TypeScript	SSR / ISR	Node.js	GraphQL / REST	Design Systems	Performance Optimization
CI / CD	Testing	Micro-Frontends	AWS CloudFront	Mentoring		

EXPERIENCE

Zalora Group Jul 2023 - Jan 2026

Software Engineer II

Remote

- **Directed technical strategy** for a high-priority video content rollout; advocated for Contentful + AWS CloudFront architecture over proposed Vimeo integration, avoiding SDK dependency and establishing redundant CDN layer to eliminate provider SPOF
- **Led migration** of Login, Signup, and Unisex core modules from legacy PHP to Next.js; delivered full transition in 6 weeks with comprehensive test suite, ensuring zero rollbacks
- **Resolved critical Single Point of Failure** by implementing Contentful CDN caching and query optimization; used Grafana and Elastic APM to monitor latency, achieving high availability with stale-content fallback
- **Partnered with Data Engineering** to restructure Segment event tracking; reduced Monthly Tracked Users (MTUs) from 7.7M to 1.9M by optimizing UUID mapping, significantly cutting annual SaaS billing
- **Collaborated with Product Managers** to launch Keep Shopping and Interactive Journey features; integrated Optimizely and Mixpanel enabling data-driven validation of 70% increase in New Customer Conversion Rate (NCCR)
- **Developed 3 custom Contentful App Framework tools** automating manual marketing workflows, saving 20+ hours per week
- **Acted as primary maintainer** for Auth and Segment modules; established Sentry alerting and conducted technical interviews for Senior candidates

Codingmart Technologies Jul 2020 - Jul 2023

Product Engineer

Coimbatore, India

- **Established first headless design system** for Zalora (via Codingmart); architected lightweight React + CSS library from scratch in zero-design-system environment, enabling 70% faster deployment of category pages
- **Developed JSL (JSON Selector Language)**, a type-safe extraction tool used in production to prevent application crashes from unexpected API data shapes
- **Integrated Multisys and Bridger Pay** payment gateways to optimize checkout flow; contributed to Community Influencer Program pilot for user retention strategies
- **Mentored cohort of 15 junior developers**; 10 successful full-time conversions; supported campus recruitment at 10+ regional universities

ProPlus Logics Solutions Apr 2018 - May 2018

Intern

Coimbatore, India

- Built complete inventory management application from scratch using PHP and MySQL

Intern

Coimbatore, India

- Developed practical applications using C programming fundamentals

PROJECTS

JSL (JSON Selector Language)

Type-safe extraction tool for dynamically selecting JSON values in client-side environments. Published under Zalora organization on GitHub.
TypeScript, JSON, Parser

Splitpanunga

Full-stack money management application (Splitwise clone). Built with React frontend, Express.js server, and PostgreSQL database.
React, Express.js, PostgreSQL

Map.io

Interactive map playground powered by Bing Maps API, rendered with React. Finds optimized routes and animates travel paths.
React, Bing Maps API

FriendFinder

Social networking platform. Elasticsearch for user search, Socket.io for real-time chat, MongoDB via Mongoose, Express.js with Sequelize ORM for PostgreSQL.
React, Elasticsearch, Socket.io, MongoDB, PostgreSQL, Express.js

SKILLS

Frontend & Core:

TypeScript, JavaScript (ES6+), React, Next.js (App Router, SSR/ISR), Redux, Zustand, HTML5, CSS3, Tailwind CSS, React Query, TanStack Router

Testing & Quality: Jest, Vitest, React Testing Library, Sentry, Web Accessibility

System Design & DevOps:

Micro-Frontend Patterns, API Integration (REST/GraphQL), Docker, CI/CD (GitHub Actions, Jenkins), AWS CloudFront

Observability & Tools: Grafana, Elastic APM, Segment, Mixpanel, Contentful (Headless CMS), Optimizely

EDUCATION

Bachelor of Engineering in Computer Science

2016 - 2020
