PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years of experience building high-traffic e-commerce products with React, Next.js, TypeScript, and JavaScript. Led a 6-week PHP-to-Next.js migration with zero rollbacks, cut annual SaaS costs by 75%, and built a headless design system that significantly shortened page deployment time. Strong in frontend architecture, Core Web Vitals, performance, design systems, experimentation, testing, accessibility, and production observability.

CORE COMPETENCIES

Frontend Architecture

React, Next.js & TypeScript

Design Systems & Storybook

Core Web Vitals & Performance

SSR, SSG & ISR

Testing & Accessibility

Experimentation & Analytics

Technical Mentoring

WORK EXPERIENCE

Zalora Group Jul 2023 - Jan 2026

Software Engineer II

Remote

- Led the migration of Login, Signup, and Unisex modules from legacy PHP to Next.js in 6 weeks, with zero rollbacks and zero production regressions.
- Cut annual SaaS costs by 75% by redesigning Segment event tracking with Data Engineering, reducing monthly tracked users from 7.7M to 1.9M while preserving business-critical analytics.
- Removed a production single point of failure through Contentful CDN caching and query improvements, with monitoring across Grafana, Elastic APM, and Sentry.
- Saved marketing teams 20+ hours per week by building a Next.js application with the Contentful Management API, Google OAuth, and API Routes for bulk content uploads.
- Developed three custom Contentful App Framework applications that automated editorial and marketing workflows and reduced repetitive content operations.
- Designed a Contentful and AWS CloudFront video-delivery architecture as a maintainable replacement for the proposed Vimeo integration.
- Contributed to a 70% increase in New Customer Conversion Rate through A/B experiments delivered with Product teams using Optimizely and Mixpanel.
- Mentored engineers, reviewed code, participated in technical interviews, and worked with Product, Design, Backend, QA, and Data Engineering teams.

Zalora Group via Codingmart Technologies Jul 2020 - Jun 2023

Software Engineer

Remote

- Architected Zalora's first internal headless React component library: unstyled, prop-configurable components powered by Contentful, including banners, carousels, bubbles, grids, flexible grids, recommendation feeds, and timers. Coordinated implementation across developers while establishing responsive behavior, CLS mitigation, accessibility, unit testing, Storybook documentation, and GitHub Actions CI/CD, significantly shortening deployment time for six category pages and numerous marketing pages.
- Mitigated Cumulative Layout Shift (CLS) on dynamic category-page carousels by analyzing banner-placement patterns with Product, applying position-aware minimum heights for hero placements, and rendering component-specific skeleton states.
- Designed and built JSL, a type-safe TypeScript library used in production to extract deeply nested values from changing JSON API responses.
- Implemented Multisys and Bridger Pay payment gateway integrations for customer checkout flows.
- Built customer-facing e-commerce features and experiments in Agile teams across Product, Design, Backend, and QA.

OPEN SOURCE & SELECTED PROJECTS

JSL (JSON Selector Language) Open Source

Designed a type-safe extraction API for safely consuming deeply nested, changing JSON responses; adopted in production and published under the Zalora GitHub organization.

TypeScript

Contentful Response Unwrapper npm Package

Built and published a tested utility that converts nested Contentful responses into plain, type-safe JavaScript objects across Node.js and browser environments.

TypeScript, Vite, Vitest

Zalora Headless Design System Frontend Architecture

Built an internal library of unstyled, prop-configurable components that enabled Contentful-driven page creation, significantly shortened deployment time, and supported seamless responsive behavior across six category pages and numerous marketing pages.

React, TypeScript, Contentful, Storybook, GitHub Actions

Splitpanunga Full Stack

Expense-sharing application with responsive React interfaces, an Express.js API, and PostgreSQL persistence.

React, Express.js, PostgreSQL

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux, Zustand, Storybook

Architecture & Performance: Frontend Architecture, System Design, Core Web Vitals, CLS Mitigation, SSR, SSG, ISR, Component Libraries, CDN Caching, Code Splitting, Lazy Loading, Responsive Design, WCAG

APIs, CMS & Data: REST APIs, GraphQL, TanStack Query, SWR, Contentful, Contentful App Framework, Segment, Mixpanel, Optimizely

Testing & Delivery: Jest, Vitest, React Testing Library, GitHub Actions, Jenkins, Docker, Git, pnpm, Turborepo

Cloud & Observability: AWS CloudFront, Sentry, Grafana, Elastic APM

Engineering Practice: Technical Mentoring, Code Reviews, Technical Interviews, Agile Development, Cross-functional Collaboration

EDUCATION

Bachelor of Engineering in Computer Science

2016 - 2020
